

C'BOOSTER flexible pouch case packers

Description

C'BOOSTER PACKING MACHINES

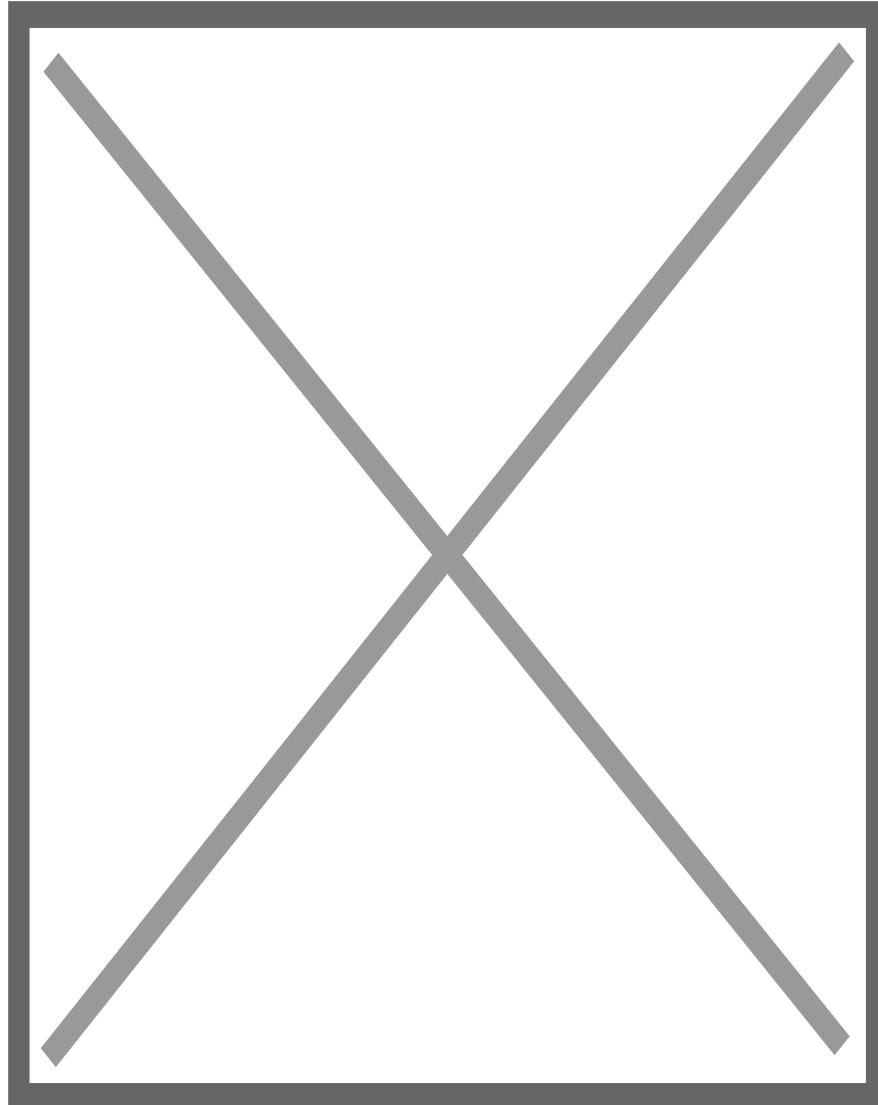

Proven solutions for packing full bags into boxes, to guarantee you lasting high-quality results.

A range of packing machines designed to adapt to the specific configurations of each automatic packaging line.

A comprehensive range:

- Controlled box transfer technologies: pallet conveyors, side belts, ball-belt conveyors, etc.
- Multiple packing chute solutions with: glue flap protection, mechanical or pneumatic bag retarders, specific surface treatments, integrated box flap openers, etc.
- Easy access to secure packing zones for maintenance operations, and box format changes in less than 5 minutes

Equipment complies with Machinery Directive 2006/42/CE. Conformity verified and validated by an independent body.

Specific features

Our C'BOOSTER packing machines provide you with fully automatic solutions: – management of an accumulation of boxes at machine infeed,- box held precisely under the chute to take the bag,- top flaps of the box opened,- controlled speed of insertion of the full bag into the box, **whether or not bottom is glued**,– removal of the full box. They are designed to pack bags and boxes from 1.5L to 20L.
